RE: Landfill Daily Cover Soil  
Barth Smelting Site  
Newark, NJ

Dear Mr. O'Brien:

Based on the review of the results from York Analytical Laboratories, Inc. (Sample No .13K0611-01 through 03), I have determined that this soil meets the criteria for non-hazardous I.D. 27 soil and is acceptable for use as daily cover. However the Authority requires Full TCLPs for all contaminants. The results you provided are reported as "Totals" instead of the required "TCLP levels". The Authority is approving this soil because the majority of the contaminants reported are "Non Detectable" levels. I would like to have you submit Full TCLP test results to me before the end of the job. That being said this soil may be delivered to the Cumberland County Solid Waste Complex for use as daily cover.

All debris (wood, plastic paper, etc.) must be removed from the soil prior to delivery.

All concrete, brick, blocks, and rock over 6 inch in any dimension must be removed prior to delivery.

Per our various discussions, sampling and analysis is to be conducted at the rate of one per 1,000 cubic yards of soil. This letter is granting approval for approx. 3,000 tons. **The results of the additional sampling are to be submitted as soon as possible.**

All trucks transporting the above referenced soil to the Cumberland County Solid Waste Complex must be A-901 registered vehicles, must have towing hooks both front and rear and must be properly tarped.

Each truck delivering soil from the above referenced site must present a copy of the attached form signed by me to the weigh-master upon arrival at the Cumberland County Solid Waste Complex along with Beneficial Soil Solutions, Inc.'s "Shipping Documents". **Trucks not presenting a copy of this form to the scale house will be denied admittance to the facility.**

All trucks transporting the above referenced soil must be weighed at the Cumberland County Solid Waste Complex and will then be directed either to the working face of the landfill or to the soil stockpile area where the load will be tipped.

Delivery of the soil to the Cumberland County Solid Waste Complex may begin on Monday, December 16, 2013, contingent upon the submission of a list of the A-901 license numbers of the trucks (if different those already on file with us) that will be used to transport the soil.

Mr. Richard O'Brien

Please call Mr. Craig Truitt at (856) 825-3700 regarding any rescheduling of the delivery of the soil to the landfill.

Very Truly Yours,

James B. Rocco
